- HTML
- JavaScript
- Python
- React / Redux
- Node.js
- Express
- PostgreSQL
- Git

SUMMARY

I have an education and work background in human development and psychology. I am passionate about helping people to empower themselves and reach their goals.

This passion has helped push me from the field of social services into full-stack software engineering, where I seek to leverage my talents for a greater impact and to bring my love for the challenge and creativity that software engineering solutions involve to bear in order to help people and organizations reach their goals in new and constantly evolving ways.
